

UAI Contributed Content Guidelines

Company/Brand Overview

[Utility Analytics Institute](#) (UAI) is a brand within the [Endeavor Business Media](#) organization. Our product/service is bringing together and supporting analytics professionals within the utility industry as they strive to increase their knowledge of utility analytics and use data and data tools to generate insights, process improvements, savings, and new products for their organization to improve the lives of their customers, employees, and their communities.

UAI supports utility analytics professionals through:

- Facilitation of member-led community presentations and conversations.
- Production of high-quality events for networking and continued collaboration where non-members are also encouraged to participate.
- Award recognition for excellence in the utility analytics profession through innovation.
- Research through surveys resulting in analysis reports for evangelism of analytics across their organization.

About UAI Utility Members

Analytics professionals at various organizational levels and analytics-related expertise within domestic and international utilities or utility-related organizations.

All ownership models, sizes, and services, with the vast majority providing energy generation and distribution.

Educated in areas of energy, utilities, technology, data, and analytics, and in most cases are currently employed in one or more of these areas.

UAI members

Non-member utility
analytics
professionals within
utilities

Non-member utility-
related
organizations,
solution providers,
and higher education

Tone of Articles

- Self or company promotion is prohibited and will be met with editorial pushback.
- Articles should communicate reliable expertise in the subject matter.
- Content should be more academic in nature as opposed to editorial.
- Utilities are looking for ideas and illumination on how to increase their knowledge of analytics, how it can be applied within the utility industry, and how they can increase their organizational investment in obtaining, storing, and studying data while improving the lives of customers, employees, and their communities.
- UAI members appreciate new ideas, innovative ways of applying best practices along with substantial use cases that include data sources, methodology, and process. They want to know how their peers are approaching daily challenges and opportunities.

Contributor License Agreement

A contributor license agreement (CLA) will be sent for e-signature to the company representative and the author. A CLA is required for each author and will cover all articles submitted by that author for the company.

Please make the authorized company signer and the author(s) aware an e-signature request is forthcoming, so they will recognize the request. All signers will receive a copy automatically once the CLA has been signed by all parties.

Include the following information with the articles for authors who have not previously signed a CLA:

Company

- Address
- Authorized Signer's Name
- Authorized Signer's Title
- Authorized Signer's Email

Author

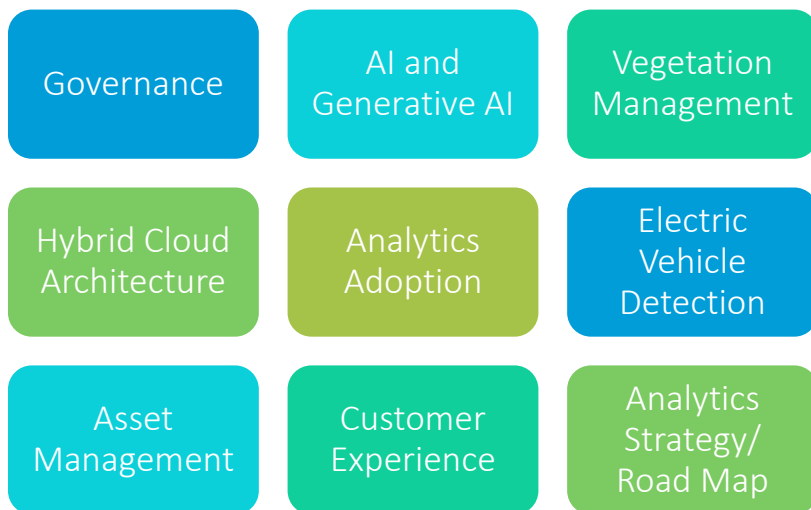

- Name
- Email

Format and Structure

1. Articles should be written with SEO in mind.
2. Content must be submitted in Microsoft Word and may include one feature image and up to two graphics that illustrate a concept. See imagery requirements below.
3. Use APA 7 style in articles in regard to in-text citations and reference list: [APA Formatting and Style Guide \(7th Edition\) - Purdue OWL® - Purdue University](#).
4. Callouts and highlighted quotes must be text, not imagery. We recommend identifying them in the article using the “Intense Quotes” style.
5. Recommended length of submissions is 800-1200 words.
6. Use one space after a period.
7. We will add a line with information about UAI and an internal link.
8. Include canonical URL for articles previously published on your website.
9. We strongly encourage the use of links from Utility Analytics Institute (<https://utilityanalytics.com>) and our sister brand, T&D World (<https://www.tdworld.com>). Outside links will be considered based upon relevancy to content and other considerations.

Topics

The best way to identify popular topics is to actively participate in community conversations and discussions. However, we have listed several topics of interest.

Editorial Control

Please see the CLA regarding Editorial Control. We do not provide copyedit. However, light editing may occur as deemed necessary to publish. Note: The title and opening paragraph will always be edited on previously published articles for SEO purposes.

Imagery

High-resolution images must be provided in .png or .jpg format scaled to 1200 x 900 pixels.

You must either own the imagery/graphics or have a license for perpetual publication of them.

Cite the source of ownership and idea (if different) below your original graphics.

UAI can provide a feature image if needed.

About the Author

- Please provide a one-sentence author bio.
- Please provide a link for the byline. If none is provided, we will use the company website URL.

Content Promotion

We will post your content on <https://utilityanalytics.com> and forward your article to our EBM-related Energy brands for consideration; publication on EBM-related brands is at each editor's discretion.

UAI will promote your content across UAI social media channels. In exchange, we ask that you promote your content among your social media networks accordingly and tag UAI in all posts:

- LinkedIn: Utility Analytics Institute.
- X (formerly Twitter): @weareuai.
- Facebook: Utility Analytics Institute.

We recommend the authors also follow Utility Analytics Institute on these channels, so they will be able to repost quickly.

The CLA agreement outlines publication rights for the article.
